Annual Training Product Development Plan 2023-24

The *Annual Training Product Development Plan* provides a targeted overview of the training products to be developed as part of the activities described below. These activities address skills and capabilities priorities described in the [Workforce Plan](#) and are supported by key stakeholders.

This *Annual Training Product Development Plan* only identifies activities that require changes to training package products, such as updating and reviewing existing training products, creating new training products to reflect industry skills needs, and or deleting training products that are no longer required. AMP Australian Meat Training Package					
<p><i>This project is the continuation of the full review of the AMP Australian Meat Training Package which commenced in 2021, to be completed in stages to minimise disruption to current apprenticeships and ongoing training and workforce development. The first stage focused on some Certificate III and all Certificate IV qualifications and has been completed in December 2022.</i></p>					
AFP_ANN_2324_001 AMP Training Package Review Stage 2— Certificate II	Stage 2 of the full review of the AMP <i>Training Package</i> will focus on Certificate II qualifications and accompanying units of competency, in particular reviewing the core units, addressing duplication issues, reviewing and adjusting units to better reflect the level of the task described and updating the qualifications to address non-compliance and structural issues.	For review: <ul style="list-style-type: none"> • 3 qualifications • 6 skill sets • 163 units of competency. See Attachment A for list of products being reviewed. AHC Agriculture, Horticulture and Conservation & Land Management Training Package.					
<p>The following three projects are the final cluster of a 'unit sector approach' undertaken over the past three years by Skills Impact to complete a full review of the AHC Training Package and bring the AHC Training Package up to date with current work methods and skill needs.</p> <p>All three projects will run simultaneously to minimise overall disruption to the AHC training package and its users.</p>					
AFP_ANN_2324_002 Rural Operations— Certificate II	<p>This project will undertake an in-depth analysis of how the AHC21216 Certificate II in Rural Operations is utilised, particularly in the northern region of Australia, followed by an update to the qualification so that its outcomes meet the unique needs of learners and workplaces in rural and remote areas.</p> <p><i>Rural Operations— Certificate II Project website page coming soon!</i></p>	<p>For review:</p> <ul style="list-style-type: none"> One qualification - <i>AHC21216 Certificate II in Rural Operations</i> <p>In addition to changes to the qualification there is a provision for the development of up to 5 units of competency to assist with ensuring the qualification addresses specific skills needs for those in rural areas.</p>	Routine— 12 months	30 November 2023	30 November 2024

AHC Agriculture, Horticulture and Conservation & Land Management Training Package					
AHC Improvements Project	<p>Over the past few years, the AHC training package has been undergoing significant revision using a 'Unit Sector' approach, to bring it up to date with current work methods and skills needs. As a result, several qualifications and skill sets need to be updated to incorporate units of competency that have been developed or revised in recent projects. In particular, several work health and safety and environmental care-related units have been updated which are core units in numerous qualifications.</p> <p>More information is available on the Skills Insight website.</p>	<p>Updates to training package products in the AHC Training Package include:</p> <ul style="list-style-type: none"> • 40 qualifications • 28 skill sets • 4 units for deletion • 3 units with minor amendments <p>In addition:</p> <ul style="list-style-type: none"> • a new unit developed during the recent Responding and Assisting in Bushfires Project is recommended for inclusion in the Diploma and Advanced Diploma of Arboriculture • imported units of competency in 	<p>Fast-track</p> <p>To ensure the components are up to date so that the latest available units can be utilised for training, and they reflect real (and current) job outcomes.</p>	30 June 2023	30 January 2024

FWP Forest and Wood Products Training Package					
<p>Tree Felling Project</p>	<p>Using a chainsaw to fell trees is a crucial skill in forestry operations, agriculture and arboriculture, as well as in emergency events like storms, cyclones and bushfires. Manual tree felling skills are essential for removing trees in locations or positions that make the use of large machinery unviable.</p> <p>These skills are described in three units of competency which specifically outline the number of trees required to be felled in order to demonstrate competence at a basic, intermediate and advanced level.</p> <p>Some training providers have indicated that the number of trees required at each unit level has an impact on their ability to deliver training, as practice trees can be difficult to source outside of a forestry environment. It is crucial that these units are accessible to</p>	<p>The project will review the Performance Evidence requirements of three recently updated units after issues that have been raised (post the endorsement process) that these units are not fit for purpose and create safety issues. The three units are:</p> <ul style="list-style-type: none"> • FWPCOT2274 Fell trees manually (basic) • FWPCOT3347 Fell trees manually (intermediate) • FWPCOT3348 Fell trees manually (advanced) <p>In addition, there are three qualifications that may be impacted by changes to these units and may need to be updated.</p>	<p>Fast-track</p> <p>To discuss and find solutions that will make sure the units can be safely delivered and assessed before the teach-out period expires.</p> <p>In devising solutions, consideration will be given to safety standards, accessibility of resources, competency development and training resources.</p>	<p>30 June 2023</p>	<p>30 April 2024</p>

	<p>train, so that everyone who performs tree felling work can access formal training. This must be balanced with the need for learners to demonstrate felling techniques many times, so they have the skills and confidence to perform the task safely in the field.</p> <p>More information is available on the Skills Insight website.</p>	<p>A supporting Companion Volume User Guide is also proposed for development to assist RTOs with safely implementing these units.</p> <p>This work will require involvement and consultation with the Public Safety and Government JSC. Representatives of industry will need to be involved in the consultation given the safety issues involved and the widespread use of the units by a number of emergency services.</p>
