#### **Mandatory Workplace Requirements:**

Many units of competency in the meat processing industry contain assessment components that must be completed in a workplace and cannot be achieved in a simulated environment. For each unit where this might occur, we have included the following comment in the unit draft:

‘This unit contains Mandatory Workplace Requirements, meaning that the assessment must take place in the workplace, such as in an operating abattoir. Please provide feedback if you support workplace assessment. Alternatively, if you believe assessment could be simulated, please let us know how.’

In the Key Changes below we have included the following comment: \* Flag for mandatory work requirements (to be assessed in workplace) – is it reasonable?

Your feedback on Mandatory Workplace Requirements is extremely valuable to the project, please comment in the unit of competency draft.
