

AMP Essential Meat Processing Skills Project

Summary of changes – Consensus Gathering round

Please see the comments under heading “Response to feedback (Consensus Gathering)” for the updates relating to the current drafts (February 2025).

Note about the latest changes:

- Certificate II in Retailing - The total number of units required has been reduced to 14.
- Mandatory Workplace Requirements information has been added to all relevant units in Application, Performance Evidence and Assessment Conditions sections.
- Pre-requisites information has been removed from the ‘Pre-requisite’ section in some units and inserted into the Application wording. This provides flexibility for learners who may work in a highly mechanised workplace and learners who complete tasks manually. This relates to units that require knife handling skills.
- Performance Evidence wording has been expanded in several units to apply assessment across a broader range of work settings such as micro meat processing vs larger processing premises, species and small stock vs large stock animals, number of carcasses vs minimum time period and evidence of completing shifts on the job. This wording accommodates potential changes arising from the Qualification Reform implementation.
- Knowledge Evidence statement about Australian standards deleted from Knowledge Evidence list and now refers to ‘workplace requirements’.
- Universal changes across all units include changing reference to a range of specific work settings to ‘meat processing premises’ and ‘... at workplace production speed’.
- Some unit sectors have changed, some unit titles have been updated, some units unmerged, and some units retained from the deletion proposal list.

For more detailed information, please refer to the CVIG extra information document available on the [project webpage](#).

Key to qualification/skill set/unit outcomes

New – This is a proposed new component

Major Change (New Code) - This component is proposed to be updated, with a new code

Minor Update (same code) – This component will go to a new release

Merged - This unit is being proposed to be merged with another unit

Deleted - This component is proposed for deletion

Split - This component has been split into 2 units

Red text indicates a code and/or title change

Where a pre-requisite had been reinstated this is highlighted in **GREEN**

Where a pre-requisite has been removed this is highlighted in **BLUE**

NOTE: Not all training products will have comments under 'Response to feedback (Draft 2)' as they did not require the additional consultation phase.
