

SSDCL27 On-Demand Laundry Driver - Operator

1. Job role

TCF sub-sector	Commercial Laundry and Linen Services
Functional area	On demand laundry collection and pick up services
Job role	SSDCL27 On-Demand Laundry Driver-Operator
Job role description	Performs collection and delivery of laundry items while managing frontline customer interactions, ensuring accurate order handling, timely service and positive customer experience. In the Australian laundry industry—where on-demand services and rapid turnaround are increasingly important—the Driver-Operator acts as both a logistics operator and customer-facing representative, coordinating collection, delivery and communication to support seamless service delivery.
Performance expectations	- Collecting soiled laundry from customers according to schedules or on-demand requests - Delivering clean laundry accurately and on time - Managing customer interactions during collection and delivery - Verifying order details including quantities and service requirements - Maintaining accurate documentation and digital tracking of orders - Coordinating with dispatch and customer service teams - Ensuring safe handling and transport of linen - Maintaining vehicle cleanliness and operational readiness - Meeting service level agreements and delivery timeframes - Contributing to customer satisfaction and service quality
Specialisation	Delivery operations, route management, customer interaction, digital tracking systems, logistics coordination
Application in other Textile, Clothing and Footwear (TCF) sectors	- Commercial laundry and linen services supporting collection, delivery and customer interaction functions - Textile manufacturing and finishing supporting logistics and delivery coordination - Apparel production and garment finishing supporting order fulfilment and delivery services - Technical textile and specialty services supporting specialised delivery and customer service - Textile restoration services supporting customer collection and delivery coordination - Leather and suede processing supporting logistics and customer-facing delivery functions

	Manufacturing and service industries supporting delivery operations and customer interaction roles
